OUR POSITION AND ROLE IN ASSISTING INSURED PARTY

CLAIM ASSISTANCE

We have strong relationships with insurance companies. We know intimately the insurance products a person seeks to claim against (so we don't charge time to learn the intricacies of a specific policy). We understand insurance underwriting so we are aware of what information is required and our staff have also worked within the claims departments of several insurers, so we understand the processes. We are confident in knowing what needs to be provided and when something is able to be questioned. We can also pre-empt an issue and seek the information that is required in order to speed up the process.
